

PLAGIARISM POLICY

iJEResearch Journal follow a strong plagiarism policy. We do not accept any article which is copied from another article without providing proper reference. All the submitted papers passed through a Plagiarism Policy, initially it is checked by a software later it is checked by reviewer also.

Plagiarism checking before publication:

iJEResearch checks initial plagiarism using a software and handles it as follows:

<10 % Plagiarism: If we find Plagiarism <10% then we activate its paper id and send paper for further processing.

10-30 % Plagiarism: In this case we do not activate paper id and send back to the author for further revision.

>30 % Plagiarism: We reject paper / manuscript straight forward if Plagiarism is more than 30 % and advise the author for complete revision of paper and re submission.

Plagiarism after publication:

If we find Plagiarism in the published content, then after verifying the copied content the paper may be retracted.

iJEResearch always recommend to check Plagiarism before submission to the journal and author should not submit the same paper in more than one journal at the same time.

Plagiarism by any other Publisher

If we find our published paper copied by another author of different publisher without proper reference then we will inform editor of that publication house with complete detail. After that it will be handled at editor level

If your article follows this Plagiarism Policy, then you can send us your manuscript.
